Rudra Sharma

Computer Science Engineering Undergraduate | Full-Stack Development | Software Engineering

Faridabad, Haryana | +91-8826161594 | rudrasharma92004@gmail.com | linkedin.com/in/rudra-sharma-468b87304 | github.com/Rudra-801

PROFILE

Final-year B.Tech Computer Science Engineering student with hands-on experience building full-stack, real-time and Firebase-backed applications. Experienced with React, Node.js, REST APIs, MongoDB, Firebase, Python and recommendation systems. Built projects spanning student platforms, collaborative development tools, desktop automation and job-matching workflows, with emphasis on practical product engineering, debugging and maintainable software.

EDUCATION

B.Tech - Computer Science Engineering
Manav Rachna International Institute of Research and Studies (MRIIRS)
Faridabad, Haryana
Graduation: 2026

Senior Secondary (Class XII) - CBSE
D.A.V. Public School, Sector 14, Faridabad
2023 | 57.8%

Secondary (Class X) - CBSE
D.A.V. Public School, Sector 14, Faridabad
2021 | 73.0%

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL (Basic)
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js
Backend: Node.js, REST APIs
Databases: MongoDB, Firebase Cloud Firestore
Data / ML: Pandas, NumPy, Scikit-learn, Recommendation Systems
Core CS: Data Structures & Algorithms, OOP
Tools: Git, GitHub, VS Code, Firebase

ADDITIONAL SKILLS

Responsive Web Design • API Integration • UI Design • Debugging • Documentation • Project Presentation

EXPERIENCE

FULL STACK DEVELOPMENT INTERN | Codec Technologies Pvt. Ltd.
June 2026 - July 2026 | 1 Month
- Developed an E-Commerce Recommendation System using Python and data-processing techniques.
- Performed data cleaning, preprocessing and feature preparation; applied Content-Based and Collaborative Filtering concepts.
- Contributed to testing, debugging, documentation and project presentation, strengthening end-to-end development practices.

MAIN PROJECTS

NEXZO - Personalized Recommender System for University Students | *Firebase, Full-Stack Web*
- Built a modular student platform integrating Academics, Career, Planner, Community, Dashboard, Profile and Settings into a unified experience.
- Implemented Firebase Authentication and Cloud Firestore for user-specific persistence, progress tracking and application data, with deployment on Firebase Hosting.
- Designed connected workflows around student planning and progress while maintaining responsive, production-oriented UI behavior.

CodeCollab - Real-Time Collaborative Coding Platform | *React, Node.js, Socket.IO, Monaco Editor*
- Built a room-based collaborative coding environment for synchronized editing sessions and shared development workflows.
- Integrated a browser-based code editor with real-time communication between client and server, focusing on session synchronization and persistent project workflows.
- Worked on authentication and usability improvements for a more complete collaborative development experience.

NOVA - Desktop AI Assistant & Automation System | *Desktop Automation, AI Assistant*
- Developed a desktop assistant focused on productivity automation, tool execution and interaction with local desktop workflows.
- Structured the system around reusable actions and assistant-driven task execution to reduce repetitive manual operations.
- Focused on practical desktop interaction, workflow reliability and an extensible automation architecture.

HireSense - Resume & Job Recommendation System | *Recommendation System, Skill Matching*
- Built a resume and job-matching concept that analyzes skills against target roles and produces role-oriented recommendations.
- Designed workflows for skill extraction, job-role matching and missing-skill analysis to help users identify relevant development areas.
- Applied recommendation-system thinking to present personalized, actionable matching results.
